PROJECT DETAILS

Project Name	Duration	Technology	Description
Online Admission System	3Months	Front End- HTML, CSS, JavaScript. Back End- JSP, servlet. Database - Oracle	This project develops a user-friendly web portal for admissions and counselling, prioritizing ease of access for students and administrators. It streamlines processes, reduces manual paperwork, and enhances efficiency, ultimately realizing the vision of paperless admissions. By digitizing data and ensuring security, the system accelerates student selection and simplifies the counselling process.
Medical CRM	3 Months	Front End- Livewire. Back End- Laravel Database - MySql	In Medical CRM, visitors and exhibitors can directly connect on a one-to-one basis, scheduling appointments to discuss products. Additionally, they have the option to follow each other's profiles for updates on specific products of interest. This streamlined approach enhances communication and fosters meaningful interactions between visitors and exhibitors.
HR-Onboarding	3Months	Front End- Livewire. Back End- Laravel Database - MySql	The HR onboarding system enables applicants to register for positions, allowing HR team to assess and select suitable candidates. This project streamlines the interview selection process, reducing paperwork and workload for admins while providing a seamless application experience for applicants.
